

Manfred Bayer

Presentation title

Bridging two worlds: colloidal vs epitaxial quantum dots

Manfred Bayer is professor of physics at TU Dortmund and working on laser spectroscopy of condensed matter.

He has worked both on self-assembled and colloidal quantum dot structures. He received his diploma in physics (1992) and his Ph.D. (1997) at the University of Wuerzburg.

He is a Fellow of the APS and a foreign member of the Russian Academy of Sciences.
